## Proposal K

|  | Rate | From | To |
| :--- | ---: | ---: | ---: |
| - Bracket One | $0.65 \%$ | $\$ 0$ | $\$ 15,000,000$ |
| - Bracket Two | $0.35 \%$ | $\$ 15,000,001$ | $\$ 60,000,000$ |
| - Bracket Three | $0.10 \%$ | $\$ 60,000,001$ | $\$ 1,000,000,000$ |

In the current structure, the amount of dues that the smallest Goodwill pays as a percentage of Earned Revenue is $18.0 x$ than the largest Goodwill. This Proposal reduces this difference to 3.9 x .

This Proposal is for Members who feel the current structure is grossly inequitable but feel that a 'same rate' structure goes too far. For those who like inequity, this Proposal still requires the smallest Goodwill to pay a $6.5 x$ higher rate than the largest on their next dollar of Earned Revenue.

This Proposal also raises the cap on Earned Revenue. Each Member belonging to a Member Organization should reserve some portion of every dollar earned to support that Member Organization. Or put differently, tell me the appropriate number where dues no longer apply. Why?

In this Proposal, dues are a mere 10 cents for every $\$ 100$ in Earned Revenue over $\$ 60 \mathrm{M}$. Truth be told, this rate and threshold is arbitrary, but importantly it is not zero.

Caps on Earned Revenue also make it inevitable for inequity to worsen over time.
What about a dues structure that incentivizes growth? Well, any regressive tiered-rate dues structure disingenuously incentivizes growth because a territory with a small number of households will not have a realistic path to 'dues-free' brackets.

Next, a cap is unnecessary to prevent the 'runaway train' of GII dues but is a sure way to all but codify inequity. Instead, simply implement a "GII Dues Cap and Rebate" program, where any dues collected above CPI growth is rebated on a pro rata share back to Members. Cap the dues, not the revenue.

Let's keep it revenue-neutral, so that together, we can immediately move to the topic of 'what we want from our dues.' Equity first, value second.

Lastly, let's agree that while dues are assessed on Earned Revenue, Members in fact pay dues with Operating Margin (revenue - expenses). And each type of revenue at Goodwill has had structurally different operating margins on a historical and consistent basis. Therefore, this proposal additionally excludes from the definition Program Services and Schools revenue and discounts Business Services revenue by $\mathbf{5 0 \%}$ since it has been $35 \%$ as profitable as DGR revenue.

In the end, this is not the fairest proposal but it's the next best thing. It's the PPP - the pragmatist's preferred proposal. And it is my first choice.

| "GII Dues Cap and REBATE" Program | 2024 | 2025 | 2026 | 2027 | 2028 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Dues - Proposed Structure - High Growth (7.0\%) | \$26,960,397 | \$28,399,766 | \$29,905,456 | \$31,499,383 | \$33,169,187 |
